## SOFTWARE ENGINEER APPRENTICE

### Summary

Software engineer with a background in finance, music and social media. I became passionate about coding with the rise of blockchain technology, cryptocurrencies, mobile apps and AI, and eventually I attended a Software Engineering Immersive bootcamp at General Assembly. In twelve weeks, I was able to quickly learn about full stack development technologies and techniques, as well as implement them on both the Frontend & the Backend in order to create web applications. Motivated by a desire to work on innovative solutions for a more connected and automated world, I'd love to expand as a Junior Developer within an organization that does the same.

### Employment

**General Assembly** Boston, MA  
*Software Engineering Immersive* Mar. 2019 to June 2019

12 Weeks, 600+ Hours Full Time Software Engineering Bootcamp.

Technologies learned: HTML, CSS, AJAX, JavaScript, Node, Express, jQuery, React, Ruby, Ruby on Rails, RESTful APIs.

Four full-stack applications, one as a team project, created from scratch in an agile environment: <https://jraugustin.com>
